

## Vor Bio Announces \$75 Million Private Placement with TCGX

March 27, 2026

BOSTON, March 27, 2026 (GLOBE NEWSWIRE) -- Vor Bio (Nasdaq: VOR), a clinical-stage biotechnology company transforming the treatment of autoimmune diseases, announced today that it has entered into a securities purchase agreement to sell 5,338,078 shares of its common stock at a price of \$14.05 per share in a private placement. Vor Bio anticipates the gross proceeds from the private placement to be approximately \$75 million, before deducting any offering-related expenses. Vor Bio did not engage a placement agent in connection with the private placement. The private placement is expected to close on or about March 30, 2026, subject to the satisfaction of customary closing conditions.

The financing is led by new investor TCGX.

"BAFF/APRIL inhibition represents one of the next major waves of innovation in autoimmune disease, and telitacept is at the forefront of the field. With compelling Phase 3 data across multiple indications and tens of thousands of patients treated in China, we believe telitacept's clinical profile and robust safety data to date provide a unique opportunity to bring a differentiated, potentially disease-modifying therapy to patients globally," said Jean-Paul Kress, M.D., Chief Executive Officer and Chairman of Vor Bio. "This financing enables us to accelerate our efforts in generalized myasthenia gravis and, importantly, advance primary Sjögren's disease as a key next frontier – two large, multi-billion-dollar opportunities where significant unmet need remains and where we believe telitacept can meaningfully change the treatment paradigm. We are well positioned to deliver on our commitment to maximize the impact of telitacept for patients and drive long-term value for shareholders."

"Our investment reflects the conviction we have in the Vor Bio team and the disruptive potential of telitacept," said Cariad Chester, Managing Partner at TCGX. "With its differentiated efficacy profile, we believe telitacept has the potential to become a foundational therapy for multiple B-cell mediated diseases. We are excited to support the pivotal development program of telitacept and help build Vor Bio into a global leader in treating autoimmune diseases."

Vor Bio intends to use the net proceeds from the private placement to advance the clinical development of telitacept, including the ongoing global Phase 3 clinical trials for myasthenia gravis and primary Sjögren's disease, business development, and for working capital and general corporate purposes.

The offer and sale of the securities to be sold in the private placement have not been registered under the Securities Act of 1933, as amended (the "Securities Act"), or any state or other applicable jurisdiction's securities laws, and such securities may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements of the Securities Act and applicable state or other jurisdictions' securities laws. Concurrently with entering into the securities purchase agreement, Vor Bio and the investors entered into a registration rights agreement pursuant to which Vor Bio has agreed to file a registration statement with the Securities and Exchange Commission registering the resale of the shares of common stock issued in the private placement.

This press release shall not constitute an offer to sell or the solicitation of an offer to buy these securities, nor shall there be any sale of these securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to the registration or qualification under the securities laws of any such jurisdiction.

### About Vor Bio
